When the new spirit-form first time incarnates into a new Wesen an Overall-Consciousness-Block and Consciousness-Block are created by the spirit-form based on the type of Wesen first incarnating into. From that point on the consciousness kind

has been determined and will only reincarnate as that type of consciousness. (i.e., an instinct-consciousness will never develop into an conscious-consciousness.) When all Wesen are first animated by a spirit-form, that spirit-form will initially create an Overall-Consciousness-Block and a Consciousness-Block based on the type of Wesen the newly created spirit-form enters for the first-time:

Overall-Consciousness-Block (

Once the Overall-Consciousness-Block is created by a spirit-form, that spirit-form cannot reincarnate into the Wesen of any other type of Consciousness throughout its reincarnation cycles requiring further development through a physical Wesen
